# THE FUTURE OF ARTIFICIAL INTELLIGENCE

Author of the game-changing book *Prediction Machines* and founder of University of Toronto's Creative Destruction Lab—which boasts the greatest concentration of A.I. startups of any program on the planet—Agrawal's talks illuminate the incoming realities of A.I.: how machine prediction, stripped of all that noisy (and expensive) human thought, is on the verge of presenting us with a once-in-a-lifetime opportunity to change the way we do business, "drive" cars, run governments, and provide healthcare.

**AJAY AGRAWAL, PH.D.**
